Ports and facilities for marine energies

crédit photos : CCI de Brest

Technical solutions to meet your specifications in Bretagne

Deep-water ports, (draft 13 m), available 24/24, major surface near the docks available, all logistic services, handing of large parcels (1 crane 150 T, 2 T 100 mobile cranes), frequent landings and transport of wind turbines, well connected to road and rail networks...

Leading ports in Bretagne

Brest: First french-port for the ship repair and military shipbuilding, between the channel and the Atlantic, located within 150 miles of England Coast.

Lorient: another possibility for development in Atlantic.

And other ports that you can find on the website :
